**Absolute Value in Word Problems - Guided Lesson**

**Complete the following problems:**

**1) Three roommates were looking at their debts. Cadent is in \$234.00 of debt. Dahlia has \$192.00 of debt. Edie has a positive bank balance of \$293.00. Who owes the most money?**

**2) Marin buys a DVD for \$20, a game for \$25, and a chocolate cake for \$20. She paid for those purchases with her credit card. Marin has a bank account with a balance of \$70. How much will her purchases cost her? What will Marin's bank balance be, after her credit card bill is fully paid?**

**3) Murray spends \$19.00 for a collage bag and spends \$14.00 on pencils and pens. His friend William joins him and spends \$20.00 on pencils.**

**Murray has paid the entire amount from his account. Murray previously had a bank account balance of \$40. How much will the purchase cost him? Find the remaining balance of Murray's account after all expenses have been paid?**
