

Name _____

Date _____

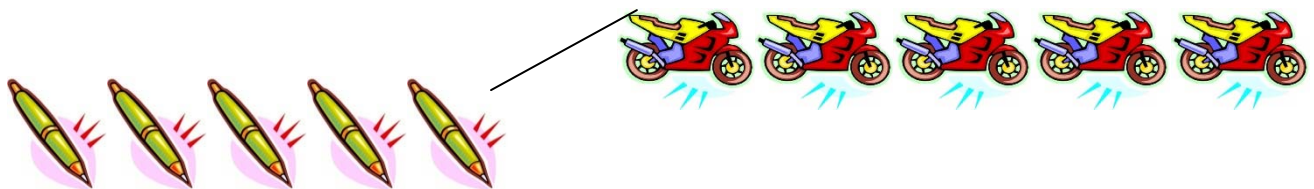

1 to Many - Guided Lesson Explanation

Explanation#1

Count the objects on the left side. There are 5 pens. Count the objects in both the groups on the right side. The top group on right has 5 motorbikes. The bottom group has 4 cars.

The number of pens on the left is same as the number of motorbikes on right.

We draw a line from the group of pens to the group of bikes.

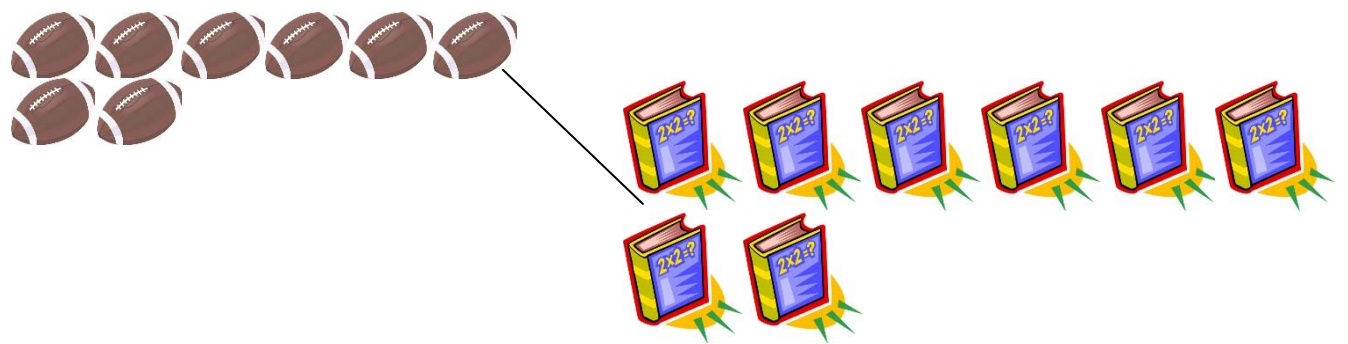

Explanation#2

Count the objects on the left side. There are 8 footballs. Count the objects in both the groups on the right side. The top group on right has 7 bicycles and the bottom group has 8 books.

The number of footballs on the left is the same as the number of books on right.

Draw a line from the footballs to the books.

Name _____

Date _____

Explanation#3

Count the objects on the left side. There are 9 backpacks. Count the objects in both groups on the right side. The top group on right has 9 clocks. The bottom group has 8 baseball hats. The number of backpacks on the left is same as the number of clocks on right. Draw a line from the backpacks to the clocks.
