1 to Many - Step-by-Step Lesson
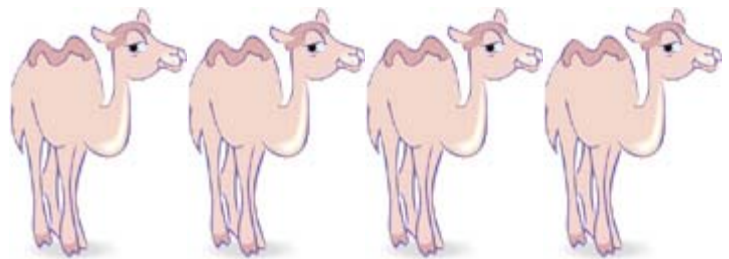

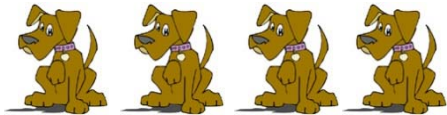

Count the number of animals in each group. Match the group on the left side with the group on the right side that has the same number of animals.

Explanation:

Step 1) Count the dogs on the left side. There are 4 dogs.

Step 2) Count the animals in both groups on the right side. The top group on the right has 3 rabbits. The bottom group has 4 camels.

Step 3) The number of dogs in the group on the lefts is the same as the number of camels in the group on right.

Step 4) Draw a line from the group of dogs to the group of camels.
