Determining Dependent and Independent Events - Step-by-Step Lesson

Clarisse bought 2 packets of coffee from one shop and 1 pair of shoes from another shop.

Are these two events dependent or independent?

Explanation:

Two events are independent if the outcome of the first event does not affect the outcome of the second event.

These two events are independent. The 2 packets of coffee which she bought from one shop will not affect her choice of the pair of shoes which she bought from another shop.
