

Using Estimation with Word Problems Guided Lesson

1) Daisy needs to purchase a series of tickets for herself and 3 friends. Each of them needs a \$62 bus ticket, \$92 train ticket, and a \$29 amusement park ticket. Quickly estimate the amount of money that Daisy needs for this purchase.

2) Niles spends 23 hours a week using his iPhone. Assuming there are 52 weeks in a year, estimate the amount of time Niles will spend on his iPhone in a year.

3. Casey scores an average of 28 points for her Basketball team every game. This year there is a 32 game schedule. Estimate the number of points Casey will score this season.
