

Name _____

Metric Capacity Guided Lesson

1) Bryan spilled a 1.5L container of milk on his kitchen floor. Bryan has paper towels that can each absorb 100mL of milk. How many paper towels will Bryan need to absorb all of the milk that he spilled?

2) Convert the following values to liters:

a) 453 mL

b) 2,374 mL

BONUS: 3) Morgan needs to drain his bath tub. The bath tub is filled with 105 liters of water. Morgan has a water pump that can drain 750 mL of water per minute. How long will it take for the pump to drain all of the water in the tub?
