

# Reviewing Money – Guided Practice

Name \_\_\_\_\_

Date \_\_\_\_\_

Make change. Mark how many of each bill you need.

Item cost	Money given	Change needed	 \$50 bill	 \$20	 \$5	 \$1
\$47	\$50					

Solution: Here the change amount needed can be found by subtracting money given and item cost.  $\$50 - \$47 = \$3$ . Fill in the cells with the number of each bill you will need in order to pay the change. The change here is:  $\$3 = 3 \times \$1$ .

Item cost	Money given	Change needed	 \$50 bill	 \$20	 \$5	 \$1
\$47	\$50	\$3	0	0	0	3

Practice Problems.

	Item cost	Money given	Change needed	 \$50 bill	 \$20	 \$5	 \$1
1	\$39	\$50					
2	\$168	\$200
