Rounding Integers Based on Place Value- Step-by-Step Lesson

Lesson- Rounding To 10s, and 100s:

- a) Determine the place value of the underlined number. If the number represents the tens place, write a "T" in the space provided. If the number represents the hundred place, write an "H" in the space provided. If the number represents the ones place, write an "O" in the space provided.
- 1) 5<u>3</u>2 _____
- b) Write the missing digit.
- 2) 3 tens + ____ ones = 34

Explanation:

5**3**2

Hundreds	Tens	Ones
5	3	2

It would be a "T".

- b) The value is 34. There are 3 tens and 4 ones in 34.
- $3 \text{ tens} + \underline{4} \text{ ones} = 34$
