Rounding With the Help of a Numbers Line Lesson (Tens Place)

Round the number **276** to the nearest whole ten. The number line can help.

First locate the number 276 on the number line. The red arrow shows the position of the number. Here, we have to round off 276 to the nearest whole ten. Look just to the right to it and if that digit is greater than or equal to 5, add one to the rounding digit and change all digits to the right of the rounding digit to zero.

So, rounding 276 to nearest tens, it becomes 280.
