Telling Time – By Fifteen Minutes Lesson

What time is it? Answer using digits and a colon (for example, *11:15*).

The shorter hand is the hour hand. It tells you the hour. The longer hand is the minute hand. It tells you the minutes.

First, find the hour hand. The hour hand is between 5 and 6. The hour is 5. Next, find the minute hand. The minute hand is at 3. To find the number of minutes, count the minutes by reading the 60 small tick marks starting at the 12. Each tick mark is equal to a minute. There are 15 minutes. This clock shows 5:15.

5:15
