## Line Graph Word Problem Guided Lesson Explanation

The chart gives us a good understanding of how much money each movie made each week. We can see from the chart that each movie followed a consistent pattern. Let's rank the movies revenues for each week. 1= highest earner 2 = middle earner 3 =lowest earner.

We can see that Marvel's Avengers is the consistent top earner. Captain America: Civil War is the consistent second earner. Batman v Superman is the consistent lowest earner. We would just match the top earner to the highest value and the lowest earner to the lowest value.

Movie	First 5 Weeks Sales
Captain America: Civil War (2)	$561,050,725
Marvel's Avengers (1)	$321,322,593
Batman v Superman (3)	$392,557,147
