Addition Word Problems to 20 - Guided Lesson Explanation

Explanation to #1

Step 1) Identify what is being asked of you.

" How many blankets did the store have in all?"

Step 2) We are looking for how many blankets are there. So we need to count all the blankets.

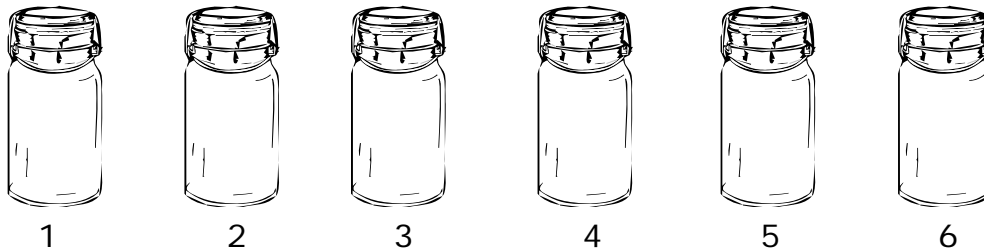

Step 3) There are 7 blankets in the department store.

Explanation to #2

Step 1) It is clear that they want to know the total number of jars of sauce.

Step 2) We could count all the jars in the picture. This will tell us the total number of jars of sauce.

Step 3) By counting we get that there is a total number of 6 jars.

Name _____

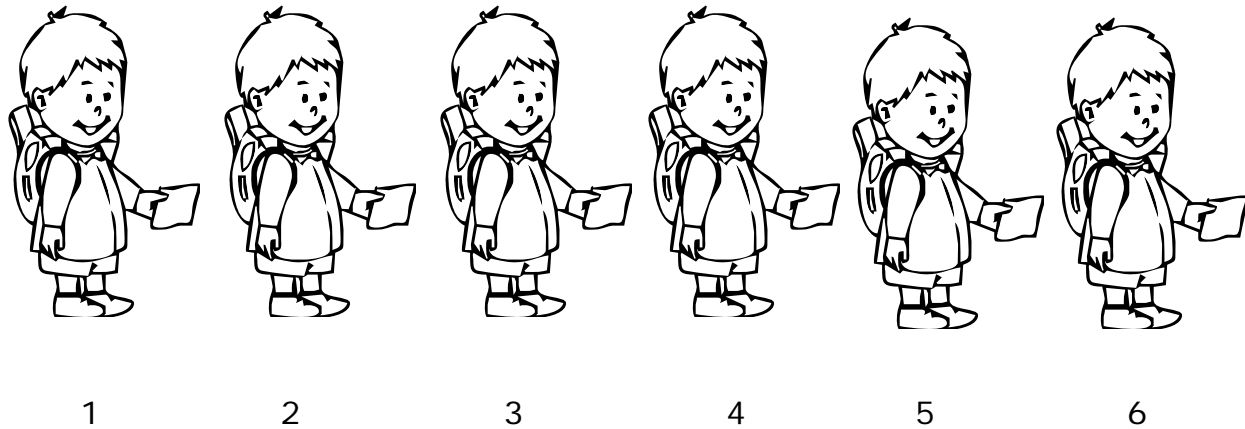

Date _____

Explanation to #3

Step 1) What is being asked of you?

"How many new students are there in all the language classes?"

Step 2) We have to count all the students.

Step 3) By counting, we see there are 6 students in all the language classes.
