Attributes of Shapes Guided Lesson Explanation

Explanation to #1

Step 1) Count the triangles in the given box.

A triangle is a closed figure with three sides.

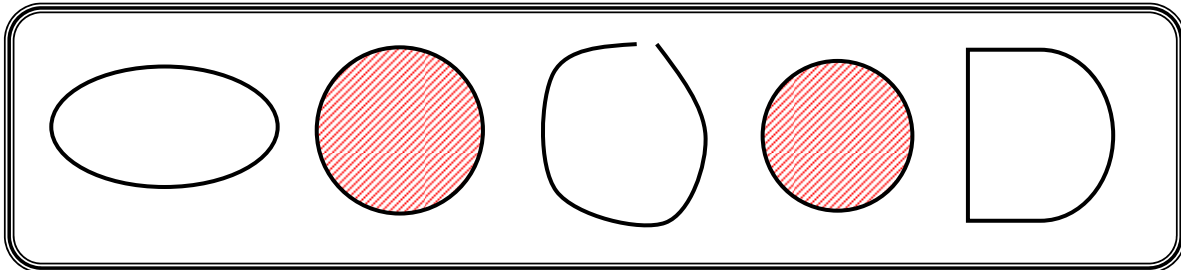

So, if we count triangles in the above box there are 2 triangles.

Explanation to #2

Step 1) We have to find all the circles and shade all of them.

Step 2) A closed curve with all points in one plane and the same distance (radius) from the center is a circle.

Explanation to #3

Step 1) Find all the rectangles that are in the given box.

A rectangle is a four sided closed figure which has opposite sides equal and parallel and each angle is 90 degree.
