

## Add and subtract equations with equal sign - Guided Lesson Explanation

### Explanation to #1

Step 1) Identify what is being asked of you.

"Which sign is missing?"

Step 2) On left hand side, if we add we get  $(6 + 3) = 9$ . If we subtract we get  $(6 - 3) = 3$ . On right hand side, we have 3.

So, we have to put the subtraction sign in the box.

### Explanation to #2

They want to know if the number sentence is true or false.

We have to solve the each equation.

$$13 - 4 = 8 + 1 = 13 - 6 + 2 = 5 - 3 + 7 = 9 \quad ( \quad )$$

$$13 - 4 = 9$$

$$8 + 1 = 9$$

$$13 - 6 + 2 = 9$$

$$5 - 3 + 7 = 9$$

All the answers are same. So, this equation is true.

### Explanation to #3

Step 1) Identify what is being asked of you i.e.

We want to know from which equation we get number 14.

$$7 - 7 = 0$$

$$3 + 8 = 11$$

$$10 - 4 = 6$$

$$9 + 5 = 14$$

So, we get 14 by  $9 + 5$ .
