Add and subtract equations with equal sign - Step-by-Step Lesson**Lesson 1 Addition Problem:**

If the problems below are correct, place a circle around them. If the problems are not correct, cross them out.

1.) $8 + 2 = 10$

2.) $5 + 4 = 8$

**Explanation:**

Step 1) First we have to identify whether both sides are equal or not.

Step 2) When both sides are equal, their result should be same.

Left side = Right side

$$8 + 2 = 10$$

$$10 = 10$$

$$8 + 2 = 10$$

Left side = Right side

$$5 + 4 = 8$$

$$9 = 8$$

$$\cancel{5 + 4 = 8}$$
