Horizontal Subtraction Math Facts Story Problem Step-by-Step Lesson

Mike was delivering packages. Mike started the day with 8 packages he delivered 5 packages, how many packages does he have left?

Explanation:

When you have objects drawn out in a subtraction problem, you can simply cross out the number of objects being subtracted. Take a look below. For every package we cross out, one package is being subtracted.

$$8 - 5 = 3 \text{ left over boxes}$$
