**Length Word Problems In Units- Guided Lesson**

Complete the following problems:

1) Sam goes to the flower shop. He bought a flower for his wife on her birthday. His wife wants to put the flower in a flower pot. She has a small flower pot. So she wants to know the length of the flower. What's the length?

2) Luke bought a can of jam for his daughter. He wants to put the jar in the freezer. He wants to know the height of the container he can place the can in. How many units long is the jar?

3. Freya's plays guitar in her school music competition. She wants to carry her guitar on the school bus. She thinks the length of guitar is too big for the bus. What is the unit length of Freya's guitar?
