

Relate Counting to Addition and Subtraction

Math Posters From © www.mathworksheetsland.com

Add by 2 to reach 20 from the starting number 8.

We have to add 2 to the starting number and repeat till we reach 20.

$$8 + 2 = 10$$

$$10 + 2 = 12$$

$$12 + 2 = 14$$

$$14 + 2 = 16$$

$$16 + 2 = 18$$

$$18 + 2 = 20$$

Add by 4 to reach 250 from the starting number (226).

Circle the number that does not belong in the count.

226 230 234 236 242 246 250

We need to find the number that does not belong here. We have to add 4 to 226 -

$$226 + 4 = 230$$

$$230 + 4 = 234$$

$$234 + 4 = 238$$

$$238 + 4 = 242$$

$$242 + 4 = 246$$

$$246 + 4 = 250$$

there is 236 after 234, which should have been 238 but it should be 238.

226 230 234 236 242 246 250
