Date _____

Number Lines and Whole Numbers - Guided Lesson Explanation**Explanation to #1**

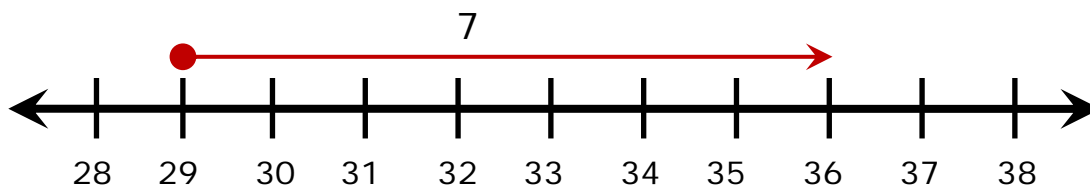

Step 1) Locate numbers on the number line. Put the first number that is 36 on the number line.

Step 2) Start counting towards right for the next seven numbers. This lands us at 43.

Step 3) The answer is:

**Explanation to #2**

As we can see that the red arrow starts with the number 29 and it ends with the number 36. Count the numbers from number 29 to 36.

The equation of sum is $29 + 7 = 36$

Explanation to #3

Put the number 59 on the number line and start counting towards left for the next six numbers. Then, stop at the sixth number it will be 53.

The answer is:
