Recognize and Draw Shapes Word Problems - Step-by-Step Lesson

Lesson 1: Recognize shapes:

What is the name of this type of figure?

- a) Hexagon b) cube c) trapezoid d) circle

Explanation:

Step 1) First we look to see what is being asked of us.

“Name of this type of figure?”

A hexagon has 6 sides. This figure is not a hexagon.

A cube has square faces. This figure is not a cube.

A circle is round. This figure is not a circle.

A trapezoid has 4 sides, with one pair of parallel sides.

So this figure is a trapezoid.
