

Name _____

Date _____

An odd or even number of members -Step-by-Step Lesson

Identify if the set of birds below is even or odd number?

Explanation:

Step 1) "Identify the set which is given below is even or odd number?"

Step 2) **Even numbers** can be divided evenly into groups of two. If they cannot be divided evenly into two groups, they are an **odd number**.

Step 3) This set has 7 birds. Splitting them in half will result in 3 birds and 4 birds. 7 birds cannot be divided evenly into groups of 2. So, this set is in odd number.
