

Name _____

Date _____

Count by 5s, 10s, and 100s Guided Lesson Explanation

Explanation to #1

We have to count by 5s ,so the sequence should follow:

$$120 + 5 = 125$$

$$125 + 5 = 130$$

$$130 + 5 = 135$$

$$135 + 5 = 140$$

$$140 + 5 = 145$$

$$145 + 5 = 150$$

In question, there is 132 after 125 , but it should be 130.

120 125 (132) 135 140 145 150

So 132 is the odd one.

Explanation to #2

Step 1) In this question we have to count by 10s , so we add 10 more to the current number.As-

440 450 460 470 480 490 500

Name _____

Date _____

Explanation to #3

Step 1) We have to find the missing number.

250 350 _____ 550 650 750 850 950

Step 2) Here we see, numbers are counted by units of 100. So if we add

$$250 + 100 = 350$$

$$350 + 100 = 450$$

So the missing number is 450 in this sequence.
