Name _____   Date _____

Add and Subtract to 100 Guided Lesson Explanation

Explanation to #1

1b) Step 1: Add the numbers at the ones place (8 + 0 = 8).

Step 2: Add the numbers at the tens place (7 + 1 = 8).

 Hence, 78 + 10 = 88

1a) Subtract 35 from 45.

Step 1: Subtract the numbers at the ones place (subtract 5 from 5).

Step 2: Subtract the numbers at the tens place (subtract 3 from 4).

Hence, 45 − 35 = 10

Explanation to #2

2a) Step 1) We have to add and subtract the two digit numbers.

Step 2) First add 4 + 7 which comes 11.

Put 1 on ones place and carry 1 in the tens place, i.e. 1 + 6 + 2 = 9

The answer is 91.

2b) 1 < 5, break up the 1 from the tens place. i.e. 11 − 5 = 6

8 − 1 − 1 = 6
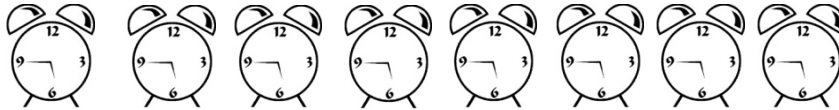

The answer is 66.

Name _____   Date _____

Explanation to #3

Step 1) This question has two parts: count the numbers and subtract them.

Step 2) We have to count the number of clocks.

Step 3) After counting the number of clocks subtract them.

8

5

-          3
