

Name: _____

Date _____

Parts of a Fraction Lesson

Color each shape as indicated by the fraction:

$$\frac{5}{9}$$

A fraction has 2 parts- a numerator and a denominator.

$$\begin{array}{c} x \\ \hline y \end{array}$$

Numerator

Denominator

The denominator denotes the total number of parts a shape has and the numerator denotes the part of the shape that is being considered.

In the shape given above, there are 9 equal parts as indicated by the denominator of the fraction and also by the total number of equal parts in the shape. The fraction 5/9 shows 5 equal parts are to be colored.

Color any 5 equal parts.

$$\frac{5}{9}$$
