Simple Area of a Rectangle - Step-by-Step Lesson

Lesson 1 - Area of a rectangle:

Find the area of the rectangle.

Explanation:

Step 1) **The area of a rectangle is equal to the equation:**

$$\text{Area} = \text{base} \times \text{height}$$

We have to find the base and height of the rectangle. They are given to us.

base: 7

height: 3

Now we use these numbers in the formula.

$$\text{Area} = \text{base} \times \text{height}$$

$$= 7 \times 3$$

$$= 21$$

So the area of the rectangle is 21. No units of measure are given, so they remain unlabelled.
