Arithmetic Patterns- Step-by-Step Lesson**Lesson 1** Identify Arithmetic Patterns

Rule: Add 15

In	Out
4	19
55	
14	
70	
27	
33	

Explanation:

We have to understand the math rule "add 15".

This means that we add 15 (+ 15) to the column of numbers "in"

As we can see that 15 has been added to 4; this gave us 19.

In the same manner add 15 to all the other rows.

$$4 + 15 = 19$$

$$55 + 15 = 70$$

$$14 + 15 = 29$$

$$70 + 15 = 85$$

$$27 + 15 = 42$$

$$33 + 15 = 48$$
