Finding Unknowns in Division

Turn it around so the number can be found!
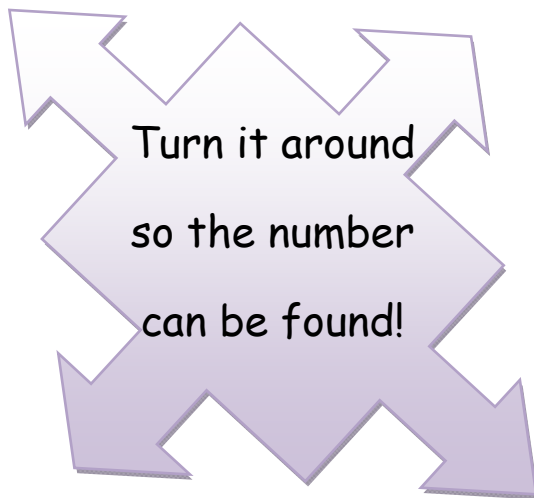

Use multiplication to solve unknowns in division

Examples

$$12/ \underline{\quad} = 4 \text{ or } 4 \times \underline{\quad} = 12$$

$$15/ \underline{\quad} = 3 \text{ or } 3 \times \underline{\quad} = 15$$

$$22/ \underline{\quad} = 11 \text{ or } 11 \times \underline{\quad} = 22$$

Use your multiplication tables to solve.
