Multi-Step Word Problems - Guided Lesson

Solve problems below:

1) Nathan's friends were collecting pieces of toffee to fill a box. Each friend had to find 11 pieces of toffee. At the end of the day, Nathan's friends had 242 toffees. How many of Nathan's friends participated?

2) Janelle purchased 15 ice cream cones and 5 cups of pudding. Each ice cream cone cost \$5 and each cup of pudding cost \$2. How much more did Janelle spend on ice cream than on pudding?

3) George bought books about art. 5 books were about outer sketching, and 9 books were about painting. Each book cost \$6. How much did George spend on the books?
