## Interpretation of Fractions - Step-by-Step Lesson

## **Lesson 1 Fractions Problem:**

What fraction of the squares are yellow?

## **Explanation:**

Step 1) First we need to know what is asked in question:

"What fraction of the squares are yellow?"

Step 2) Then, count the total number of squares. So we find that there are 6 squares. That will be the denominator of fraction.

Now count yellow squares.

2 squares are yellow color. That will be the numerator of fraction.

So the answer will be  $\frac{2}{6}$
