Products of Top Heavy Fractions and Integers - Step-by-Step Lesson

Lesson 1 Multiplication:

Calculate the product and simplify your answer.

$$7 \times \frac{6}{5}$$

Explanation:

We have to simplify the given equation.

$$7 \times \frac{6}{5}$$

To multiply a fraction by a whole number, write the whole number as a fraction with same numerator and 1 as the denominator.

Write 7 as a fraction.

$$7 = \frac{7}{1}$$

Multiply the numerators then multiply the denominators. Simplify the answer.

$$7 \times \frac{6}{5} = \frac{7 \times 6}{1 \times 5} = \frac{42}{5} = 8 \frac{2}{5}$$

This answer is in simplest form.
