Word Problems with Fraction Division - Guided Lesson

Complete the following problems:

1) The pizza shop only has one slice of pizza left. The slice is $\frac{3}{4}$ of an inch long. 6 people are on the line. If they were to share the pizza slice equally, how long would each slice be?

2) Collins has 6 friends that want to share his bag of marbles with him. His marble bag is $\frac{2}{5}$ full of marbles. How much of the bag will each person get?

3) Jeff has a large collection of work receipts from all of his business trips. The pile of receipts is $\frac{3}{5}$ of a yard long. Jeff divides the papers between 4 filing cabinets. How long is each pile of receipts in the filing cabinets?
