Converting Standard Sized Units of Measurement - Guided Lesson

Complete the following problems:

1) John uses a pepper and salt shaker. His pepper shaker holds a volume of 1 fluid ounce. Dry pepper comes in a tin that measures 1 cup. Is the volume of 10 pepper shakers greater than 1 cup?

2) Troy has a chocolate stick. It is 4 inches long. If we placed 10 chocolate sticks in line, would they be longer than 4 feet?

3) I bought a set of glasses from the market. A glass weighs 2 ounces. Do 6 glasses weigh more than 1 pound?
