**Place Value: Understanding to Round Decimals- Step-by-Step Lesson**

**What is 5.1436 rounded to the nearest thousandth?**

**Explanation:**

**Step 1) First, find the digit at the thousandths' place.**

**This is the place you want to round: 5.1436**

**Now look one place to the right: 5.1436**

**If that number is 5 or greater, round up. If that number is 4 or less, round down.**

**6 is more than 5, so you will round up. Remove all the digits to the right of the thousandths' place, if they are present.**

**5.1436 → 5.144**
