

3-Step Order of Operations

Pedro says "Follow the Order of Operations or PEMDAS"

Example:

$$5 + 2^2 \div 2 =$$

Solve $2^2 = 4$

$$5 + 4 \div 2 =$$

Divide $4 \div 2 = 2$

$$5 + 2 =$$

Add $5 + 2 = 7$

The answer is 7

Example:

$$9 * 2 - (10 - 7) =$$

Solve Parenthesis $(10 - 7) = 3$

$$9 * 2 - 3 =$$

Multiply $9 * 2 =$

$$18 - 3 =$$

Subtract $18 - 3 = 15$

The answer is 15
