Using Variables to Represent Numbers - Guided Lesson

Complete the following questions:

1) Scott bought new volleyballs (v) from Thailand. He gave 56 balls to his friend. Write the expression that shows how many balls Scott has now.

2) The equation shows the number of meals that Kerry has prepared in relation to the number of minutes she has spent working in the kitchen.

$$5T = s$$

The variable s represents the number of minutes she worked. The variable T represents the amount of meals prepared. How many meals will Kerry prepare if she worked for 2 hours?

3) Mark has p cookies. Allen has 15 more cookies than Mark. Choose the expression that shows how many cookies Mark has.

a. $15 + p$

b. $15 p$

c. $p - 15$
