Unit Rates and Ratios - Guided Lesson

Complete the questions:

1) Lewis played 12 tournaments in 3 weeks. If he keeps up this pace, how many weeks will it take to play 20 tournaments?

2) Find the unit rate.

a) 16 pens in 4 pen boxes = pens in 1 box.

b) 81 toffees in 9 packets = toffees in 1 packet.

c) 70 hutch mobiles in 5 exhibits = hutch mobiles in 1 exhibit.

3) Barbara spent \$144 on her birthday party for 18 guests. If the cost is at the same rate, how many guests will there if she spends \$176?
