Name _____   Date _____

Percentage as a Rate per Hundred - Guided Lesson

Complete the following problems:

1) Jolly went to the book shop. There she bought four books for $350. She sold a book to her friend and got back 30% of her money. How much money did she charge her friend for the book?

2) Kip has a handbag shop. Each bag costs $200. Kip is having a 20% off sale on each bag. What is the cost of a bag now?

3) Troy bought 4 dozen bananas. 40% of the bananas were used to make custard and 10% of the bananas were given to his son. Write the number of bananas Troy had left?
