### Ratios and Units of Measurement - Guided Lesson

Complete the following problems:

1) Which is more, 7 centimeters or 60 millimeters?

- 7 centimeters
- 60 millimeters
- Neither, they are equal

2) Convert and simplify your answer. Write it as a proper fraction or as a whole number or mixed number.

\_\_\_\_\_ teaspoons = 3 tablespoons

3) Divide.

40 yards 2 feet  $\div$  2
