Multiplying and Dividing Rational Expressions - Guided Lesson

Complete the following problems:

1. Multiply and simplify your answer.

$$\frac{3m - 5}{7m + 2} \times (5m + 7)$$

2) Divide. Write your answer in simplest form.

$$\frac{2c + 2}{8c - 6} \div (6c - 2)$$

3) Divide. Simplify your answer.

$$\frac{6y + 7}{6y + 6} \times (5y - 6)$$
