### Complicated Expressions - Guided Lesson

Complete the following problems:

1) Rewrite the expression in the format presented.

$$V(6 - e)^2$$

$$V \times \underline{\hspace{2cm}} \times \underline{\hspace{2cm}}$$

2) Simplify the following expression:

$$t \times u - 8 \times u - 8 \times u - 8 = \underline{\hspace{4cm}}$$

3) A parenthesis is missing from each expression below. Place the parenthesis in the proper position based on the description of the number sentence given.

**The number sentence** : Seventeen minus the sum of nine and five.

$$17 - 9 + 5$$
