Using Sine and Cosine - Independent Practice Worksheet

Complete all the problems.

1. Use the Law of sine and the Law of cosine to find the missing sides and angles of each triangle.

$$BC = 14, A = 40^\circ, \text{ and } B = 22^\circ$$

2. Use the Law of sine and the Law of cosine to find the missing sides and angles of each triangle.

$$BC = 18, A = 35^\circ, \text{ and } B = 20^\circ$$

3. Use the law of sine and the Law of cosine to find the missing sides and angles of each triangle.

$$BC = 20, A = 55^\circ, \text{ and } B = 30^\circ$$

4. Use the Law of sine and the Law of cosine to find the missing sides and angles of each triangle.

$$BC = 15, A = 70^\circ, \text{ and } B = 45^\circ$$

5. For $\triangle ABC$ find the length of c given $a = 14$, $b = 20$, $\angle c = 120^\circ$

6. For $\triangle ABC$ find the length of c given $a = 18$, $b = 28$, $\angle c = 115^\circ$

Name _____

Date _____

7. For $\triangle ABC$ find the length of b given $a = 22$, $\angle B = 110^\circ$, $c = 15$

8. Find $m\angle A$.

9. Find $m\angle A$.

10. Find $m\angle A$.
