## Cardinal Numbers and Math Directions Worksheet

Color in the first 7 shapes.

To solve this question first we need to determine the POSITION of the circle from where we will start coloring.

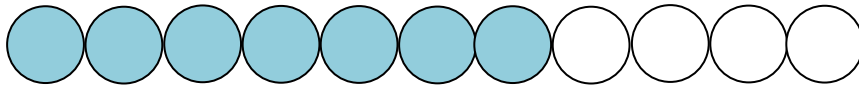

**First** = the position farthest to the left.

**Last** = the position farthest to the right.

**Middle** = position where equal number of circles are found to the left and right.

Here, the position is first. Start coloring from the first circle. Color 7 circles.

### Practice Problems

1	Color in the middle 4 shapes. 
2	Color in the last 5 shapes.
