Classifying Objects into Group Step-by-Step Lesson

Look at the pool of objects below. Grab a pair of scissors and cut out all of the objects below. Can you think of two different categories that these objects might belong to? Write the name of the categories at the top of the rectangles below and paste the object in the correct category.

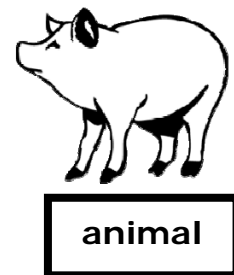

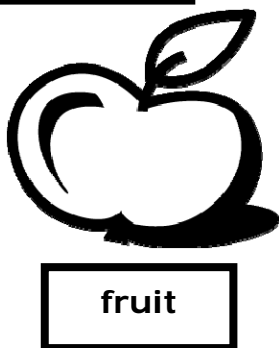

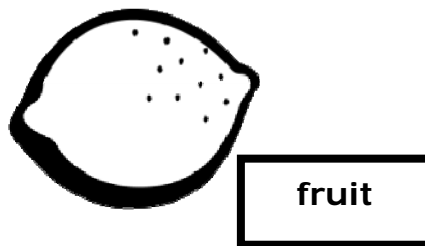

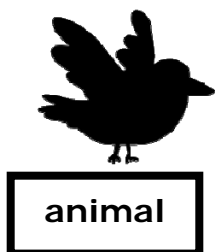

Name: _____

Date _____

Step 1) What do the things have in common?

Look at all of the objects in the pool below. Do you see any similarities that stick out in your mind?

There are a number of ways to do this. We could split them up by size, color, or shape. We could also look for objects that make members of the group the same. It looks like we have animals and fruits. Look at the tags below.

Step 2) Now that we have our labeled groups, we just need to paste them in the rounded rectangles. Make sure to label the category (animal or fruit).
