## **Guided Lesson Explanation: Counting Forward**

1) We are starting to count at the number 5 in this problem.

The next number would be 6, then 7, then 8, and continue until you reach the last line that you are provided with. This ends at the number 14.

5 \_\_ \_ \_ \_ \_ \_ \_ \_ \_ \_ \_

5 6 7 8 9 10 11 12 13 14

2) We follow the same pattern as above. In this case we start counting at the number 18. The next number would be 19, then 20, then 21, and we continue until we reach the last line.

18 \_\_\_ \_\_ \_\_ \_\_ \_\_ \_\_

18 19 20 21 22 23 24 25 26 27 28 29

3) Once again, we continue to count from a number other than 1. What comes after 13 when you are counting? 14, you got it! Then keep on going until you hit the last line.

13 \_\_\_ \_\_ \_\_ \_\_ \_\_ \_\_ \_\_ \_\_ \_\_ \_\_

13 14 15 16 17 18 19 20 21 22 23 24 25
