

Name: _____

Date _____

Describing Measurements Guided Lesson Explanation

Answer #1- The first thing we need to do is draw a line from the top to the bottom of all objects. The top line is the same for all objects. We should then draw the bottom line and carry it to the stars.

Now count the number of stars from the starting (top) line to the bottom of each object. You should end up with these numbers

2 (goose)

5 (girl)

3 (boat)

Answer #2- The bigger the number the taller the object. as you can see from the arrow below. The boy is the shortest. The man is the tallest and the woman is in between. The numbers should follow the same pattern. 3 is the smallest (boy). 6 is the tallest (man) and 5 is in between (woman)
