## Counting Money - Step-by-Step Lesson

Match the cost of the backpack to the correct amount of money in a piggybank.

### Explanation:

The backpack costs 3¢. Look for the piggy bank that has the same number of coins as the cost of the backpack. Each penny is worth 1 ¢. The piggy bank you are looking for must have 3 coins in it. The second piggy bank has 3 coins. Draw a line connecting the bag to the second piggy bank.
