Single Digit Addition Guided Lesson Explanation

We follow the steps that we have previously stated:

Step 1. Pick a starting number; we suggest the top or first number.

Step 2. Count up the number of places of the second number. The number that you end on is the total.

Let's run these three problems through these steps.

1.
$$\begin{array}{r} 6 \\ + 3 \\ \hline 9 \end{array}$$

2. $7 + 2 = 9$

3.
$$\begin{array}{r} 4 \\ + 1 \\ \hline 5 \end{array}$$
