**Two Digit Addition Guided Lesson Explanation**

All of these problems follow a similar pattern to be completed properly.

1.        **29**            Step 1. Add the ones column.

$$\begin{array}{r} + \\ \hline \end{array} \begin{array}{r} 29 \\ 47 \\ \hline \end{array}$$

$$9 + 7 = 16$$

**6**

Step 2. Break 16 into its place value.

1 tens place and 6 ones places. Place the 1 in the tens column.

**1**1.        **29**            Step 3. Add the tens column.

$$\begin{array}{r} + \\ \hline \end{array} \begin{array}{r} 29 \\ 47 \\ \hline \end{array}$$

$$1 + 2 + 4 = 7$$

**76**2.        **84**            Step 1. Add the ones column.

$$\begin{array}{r} + \\ \hline \end{array} \begin{array}{r} 84 \\ 32 \\ \hline \end{array}$$

$$4 + 2 = 6$$

**6**2.        **84**            Step 2. Add the tens column.

$$\begin{array}{r} + \\ \hline \end{array} \begin{array}{r} 84 \\ 32 \\ \hline \end{array}$$

$$8 + 3 = 11$$

**116**

3.        **37**        Step 1. Add the ones column.

$$\begin{array}{r} + \quad \underline{61} \\ \quad \quad \mathbf{8} \end{array} \qquad 1 + 7 = 8$$

3.        **37**        Step 2. Add the tens column.

$$\begin{array}{r} + \quad \underline{61} \\ \quad \quad \mathbf{98} \end{array} \qquad 3 + 6 = 9$$
