Skip Counting 5s - Step-by-Step Lesson

Find the total number of candles on all of the cakes counting by 5s.

<u>   5   </u>   <u>   10   </u>   _____   _____   _____

Explanation:

 Learning to skip count by 5 means start adding 5 to the first number which is 5. As we move to the right, we add 5 more to the number that we have.

$$10 + 5 = 15 \quad 15 + 5 = 20 \quad 20 + 5 = 25$$

5   10   15   20   25
