## Mixed Skip Counting Lesson

Follow the counting instructions to complete each counting matrix.

Count by 2s from 0 to 10

0		4		8	10
---	--	---	--	---	----

Look at the first number given.

Since we have to count by 2s, add 2 to the first number given.

$$0 + 2 = 2$$

Fill 2 in the first blank of the table.

0	2	4		8	10
---	---	---	--	---	----

Again, add 2 to the number obtained above, i.e.

$$2 + 2 = 4$$

4 is already given.

Again, add 2 to the number obtained above, i.e.

$$4 + 2 = 6$$

0	2	4	6	8	10
---	---	---	---	---	----
